

Edgware BY BBICO Sanitiser Spray - Detailed Scientific Information

Edgware by BBICO Sanitiser Spray has been independently laboratory-tested and proven to be effective against a wide range of micro-organisms, and hypochlorous acid (HOCl) products have been tested to rigorous internationally recognized standards, and comply with:

BS EN 1276 / BS EN 13704 / BS EN 1656 / BS EN 14204 / BS EN 14476 and approved by the European Biocidal Products Directive EU528/2012

Edgware by BBICO Sanitiser Spray has been proved effective against micro-organisms including, but not limited to:

Bacteria: Campylobacter jejuni / Escherichia coli including (O157) / Enterococcus species / Helicobacter pylori / Listeria / Legionella pneumophila / Pseudomonas aeruginosa / Staphylococcus aureus (including MRSA) / Salmonella cholerasuis / Mycobacteria tuberculosis / Mycobacterium avium intracellulare / Acineobacter baumannii

Bacterial Endospores: Bacillus cereus / Bacillus subtilis / Clostridium difficile / Clostridium sporogenes Fungi Aspergillus niger / Candida albicans / Trichophyton mentagrophytes

Viruses: Adenovirus type 4 / Bacteriophage MS2 / Hepatitis A & B / Herpes type 1 / HIV-1 / Infectious bronchitis / Influenza including H1N1, H5N1 and H7N9 / MS2 virus Norovirus (Human and Murine) / Orthopoxvirus / Polio enterovirus 1 & 2 / Human Coronavirus \*

Yeasts: Zygosaccharomices bailii / Candida albicans

Moulds: Botrytis (grapy mould) / Powdery mildew

Protozoa: Cryptosporidium muris / Cryptosporidium parvum

\* 2019 Novel Coronavirus (COVID-19) is a new strain of coronavirus. It is not yet available for commercial testing. Edgware Sanitiser Spray has demonstrated effectiveness (99.9999% inactivation) against coronavirus strains from the same family as the 2019 Novel Coronavirus (COVID-19) in third party laboratory testing, when used in accordance with the directions for use. Given the structural similarities of the COVID-19 virus to the coronavirus strains tested previously (SARS-CoV, MERS-CoV, Human Coronavirus), and based on the evidence available to us, we would expect our Edgware Sanitiser Spray to be effective against the new strain. Definitive scientific confirmation of this, as with all other commercially available virucides, can only be provided once testing against COVID-19 Coronavirus has been conducted, following release of the strain by relevant health authorities.
